

Thanks for Making Posture Pro

The “#1 Screening, Analysis and Education Tool in the Profession”

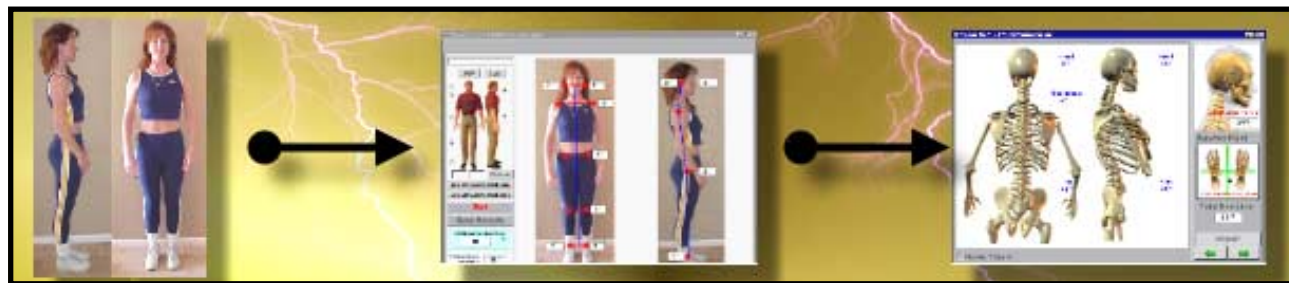

In 1995 I introduced the first version of Posture Pro software as an alternative to string devices to check posture. Since then, much has been written about the role posture plays in the biomechanics of the spine. As our knowledge of posture as an indicator to overall health expands, so does Posture Pro. Our latest version is the most advanced Posture Pro yet, thanks to you.

I made a decision early on that I wouldn't wait and release a new version once a year like other companies. I would release “mini-updates” on a regular basis, and these updates would contain features suggested by our customers. I also decided that these updates, as well as technical support, would be free.

The use of Posture Pro has grown to over 4,000 doctors in 23 countries, with an astonishing satisfaction rate of 99%. This clearly makes Posture Pro the #1 screening, analysis and education tool in the profession.

Thank you for allowing me to continue doing what I do best. I look forward to working with you. **Joseph Ventura DC**

Here's What Posture Pro Can Do

Whether you use the “59 Seconds” screening, or full analysis mode, Posture Pro is fast, accurate and reliable. Skeletal images show possible distortions and future degeneration.

Q-Angle Measurement

The Quadriceps angle is quickly and accurately measured in Posture Pro, and can be included in detailed comparison reports.

Spinal Predictions

Estimate additional spinal forces, center of gravity and compensatory changes in the spine.

All This For Only
\$1,495!

www.posturepro.com

Posture Pro comes with all the marketing tools you will need. Files to create posters, brochures, handouts, and even multimedia presentations.
