

# Books on Vaccinations and Immunizations

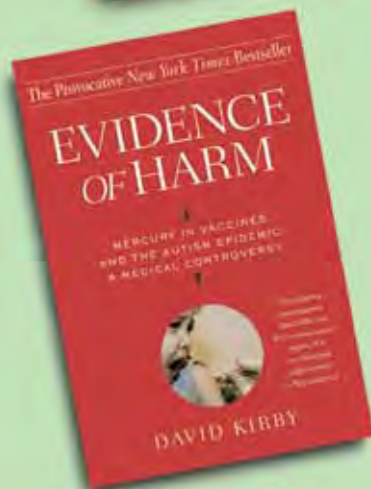

## Vaccine Safety Manual

by Neil Miller

New, Updated 2nd Edition. This manual is the most complete guide to immunization risks and protection. It includes pertinent information on practically every major vaccine: polio, tetanus, MMR, hepatitis A and B, HPV, Hib, flu, chickenpox, shingles, rotavirus, pneumococcal, anthrax, small pox, swine flu and more. Includes several charts, tables and studies. Alan Cantwell, MD has this to say about the book: "It is the most honest, well-researched, informative and up-to-date book I have ever read on the dangers of vaccines. I recommend it highly." 560 pages

## Evidence of Harm

by David Kirby

This provocative book authored by journalist David Kirby made the *New York Times* best-seller list. In this book Kirby analyzes the controversy of the rapid increase of children with autism and the link to high levels of the mercury-based preservative Thimerosal found in some vaccines. Kirby explores both sides of the issue and examines personal stories of families and the political drama in the courts and halls of Congress. 514 pages

## Immunization: History, Ethics, Law and Health

by Catherine Diodati

This text examines the science, history, law and ethics behind mass immunizations. It contains over 350 documented resources, interviews, case history reviews and Health Ministry surveys. Readers will find information on how vaccines can affect your health, your legal and ethical rights, and much more. 312 pages

## Vaccinations: 100 years

by Vera Schneibner

This was one of the first books written to inform medical professionals and parents about the short and long term effects of vaccines, the ineffectiveness of vaccines in preventing infectious diseases and the causal link between DPT and polio vaccine to crib death. Schneibner reveals that 100 years of orthodox research shows that vaccines represent a medical assault on the immune system. 264 pages

## What Your Doctor May Not Tell You about Children's Vaccinations

by Stephanie Cave, MD

Family medical practitioner Dr. Cave informs parents about the over-vaccination of children today. She explains why she believes vaccinations are associated with dramatic increases in brain and autoimmune diseases such as autism, asthma, diabetes, learning disabilities and ADHD. Dr. Cave also provides vital, down-to-earth information as to which vaccinations may be risky and what parents should consider before vaccinating their children. Includes information on hepatitis A & B, DPT, Hib, polio, MMR, chickenpox, etc. and research and safety track records for various shots. 315 pages

## 20 Reasons Why I Should Research Vaccines

by Lisa Reiss

This easy-to-read booklet clearly and concisely explains the importance of being educated about vaccines. Reiss does not tell the reader whether or not they should be vaccinated, but rather explains the overlooked safety factor of vaccines, making it possible for parents to make an educated decision. Great booklet to give to patients. 40 pages
