The Family Practice™ Is Making It Happen For People Just Like You... It's The Family Practice vision of LCFE™ (Lifetime Care For Everyone) that is helping chiropractors *really practice what they live* by providing lifetime care to their patients as a proactive healthy lifestyle.

Even with thousands of chiropractors using the word "family" in their practice names today, many have yet to find a reliable, effective way to make their dream of a family practice a reality. In The Family Practice, chiropractors are discovering just that – the essentials for building a highly successful, fun and profitable family practice.

They are learning to maximize their talents and build great teams by implementing contemporary Family Practice Marketing and Referral Systems. They are consistently attracting more new patients than ever and learning to educate people so they become lifetime patients without feeling like a script or "plan" salesperson.

Growing to new levels is easy as they master The Family Practice Office Systems for stress-free growth and implement financial systems that help them achieve abundance and get out of debt.

Best of all, you'll feel like you've come home when you join The Family Practice and love the camaraderie that comes from sharing a similar vision with like-minded people. **There is real unity with no games or egos** because our members know not one of us can be successful without the other being a success.

In The Family Practice, you'll get all the tools, training, systems and support to help you build the family practice of your dreams. We won't just sell you the tools and systems and then abandon you! You'll get twelve hours of tele-training every month along with the support of our full time implementation department. And of course, there are the dynamic Family Practice Seminars that chiropractors are raving about.

Get Real Results. Join The Family Practice today and build integrity, credibility, and results... while you build the family practice of your dreams. Call 1-866-LEAD-DCS (532-3327) to receive more information, or visit our website at www.thefamilypractice.net
