All Roads on the Chiropractic Information Highway Lead to

www.PosturePro.com

Established in 1991, VenturaDesigns has grown into the world's largest developer of chiropractic patient acquisition/education/retention products. Most know us from our Posture Pro software, the #1 spinal screening tool in the profession. But we have quietly expanded the product line to include solutions for virtually all your marketing needs, both inside and outside the office, including the Internet! Over 6,000 doctors in 34 countries rely on our products and services to build and maintain their practices. Here are a few of the current offerings from Dr. Ventura. Visit us on-line for the complete product line.

Today's digital camcorders and cameras open a whole new world of possibilities in your practice. I.R.I.S. is the software you need to open that world.

- Store/mark/send/print x-ray images taken right from your view box
- View & analyze video clips—even display two clips side-by-side. Perfect for golf swing or ergonomic analysis
- Full x-ray marking tools, including 60 degree arc and distance tool
- Export images, secured, to third-party for review
