

Anyone can make just a web site. But with

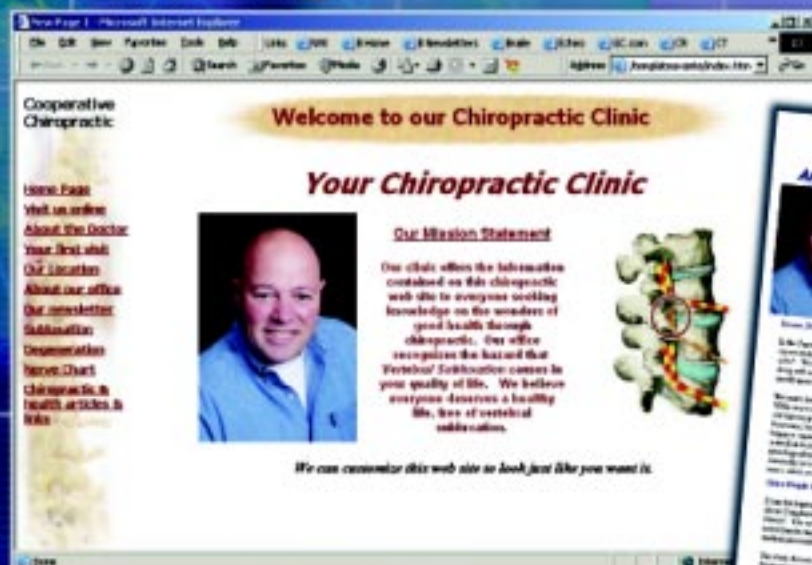

Now You Know

you get a marketing, educational
Internet Experience!

Since you designed my new web site the comments and e-mails I receive are great. I especially like the new patients being able to download my introduction form, fill it out and bring it with them when they come. It saves a lot of time. The comments about the e-newsletter are also great.

-Dr. Jim Gregg

"The 'Now You Know' email newsletter and office web site make communicating chiropractic and growing your practice easy. They are smart and effective tools that help you improve patient retention, generate referrals and become a household name in your community."

-Dr. Larry Duboff

I have found that my patients love the "NOW YOU KNOW" newsletter and forward it to internet friends. I also print it and hand it out at my front desk. It is so informative and easy, it has helped me to continue to have a strong patient education program without the difficulty and cost of producing my own newsletter.

-Dr. Danita Thomas Heagy

Now You Know gives our patients the impression that our office is in the know and on the front wave regarding health issues. Our patients forward this newsletter to their friends all over the country. Now we know, it is very important for the growth of our practice and important for public health awareness.

-Dr. Gene Cretsinger
